

LARI MINI

Angelo Mangiarotti, 1978 / 2023

Italian architect, sculptor, and designer Angelo Mangiarotti’s design approach was rooted in the firm belief that architecture was a practical discipline – and that industrial design was an expression of fine craftsmanship. He wanted each individual material to be respected and to be used in an appropriate and honest way. Beyond his many architectural feats, Mangiarotti’s work include a wide array of creative projects ranging from sculptures to products and lamps.

Lari mini is a portable version of Angelo Mangiarotti’s original Lari lamp from 1978. Just like the original Lari, Lari mini consists of a single mouth-blown piece of glass attached to a powder coated metal base.

The mouth-blown glass has a distinctive rippled structure which creates a beautiful, slightly blurred feel to the ambient light.

“Mangiarotti had a very specific approach to lighting. His designs seem to constantly play with the balance between soft sensuousness and robust practicality. We wanted to make the Lari lamp more versatile, and a battery-driven, rechargeable version seemed just right for a 2023 launch,” says Christian Elving, Co-Founder and CEO of Karakter, “Given the smaller size and weight, we hope that many more will come to enjoy the beautiful ambient light of this iconic Mangiarotti piece.”

Lari mini can cast its beautiful light in a wide range of settings – from cosy nooks in private homes and eye-catching reception desks at the office to dim, candlelit dinners at the restaurant.

Lari mini charges via a USB-C cable and goes from zero to fully charged in 3,5 to 4 hours. When fully charged, it can provide up to 12 hours of light.
